

VistaCool™

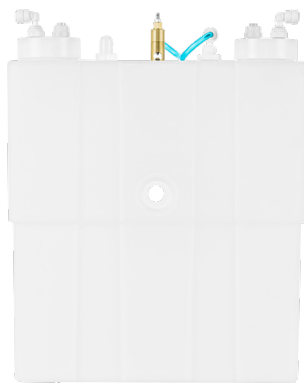

Kiss your condenser bottles goodbye.

The steam and condensation produced by autoclaves can destroy cabinets, be messy and dangerous to empty from condenser bottles and tanks, and can even melt plumbing if not cooled sufficiently before dumping down the drain.

Finally, there's an effective, reliable, maintenance-free solution! **The VistaCool direct-to-drain thermal reduction system dramatically reduces the temperature of autoclave wastewater—eliminating condenser bottles and tanks!**

VistaCool V7501

VistaCool V7502

PROTECTS STAFF

- Eliminates the need for office staff to empty steaming-hot water bottles manually
- Non-electric, self-monitoring and self-regulating system saves staff time—there's no user maintenance required!

PROTECTS DRAINS

- Prevents autoclave waste water from melting plumbing
- Built-in backflow prevention meets or exceeds local plumbing codes

PROTECTS CABINETS

- Helps prevent mold & mildew caused by spills and humid environments created by exhaust from pitchers and bottles
- Helps protect cabinets from rot and rust by sending cooled wastewater directly and safely to the drain

PATENT PENDING

COMPATIBLE WITH:

STATIM 2000 Midmark M3
STATIM 5000 Midmark M9* & M11*

* Requires Model V7502 and S7560 adapter kit.

VistaCool enables chambered autoclave units to utilize fresh water for each sterilizer cycle by sending wastewater directly to the drain!

Manufactured by *Vista Research Group*
